Armed Forces & Law Enforcement
Product Catalogue
From the muzzle loader to the modern assault rifle

The manufacture of precision weapons in Neuhausen has a history of over 148 years of development. The production of over 1.5 million weapons represents the know-how and outstanding innovation of this traditional manufacturer.

1853 The history of the pioneers of the industry: The SIG “Schweizerische Industrie Gesellschaft” was founded as „Schweizerische Waggon-Fabrik bei Schaffhausen“ (The Swiss Waggon Factory at Schaffhausen).

1860 Beginning of weapon manufacture: On the request of the Swiss Army the production of arms began.

1863 Successful product launch: Under the specification of the “Eidgenössischen Militärdepartements” arose the first muzzle load rifle “Prélaiz-Burdand”, which was used by the Swiss Army.

1864 The time ahead: The SIG breechloader system “Milbank-Amsler” won recognition over 24 competitors.

1869 Milestone in history: With the “Vetterli” repeating rifle arose the best rifle of its time. Until 1870 almost 140,000 were sold to the Swiss Army.

1877 A “lightweight” conquer abroad: Finland, Chile, Peru, Columbia and China order in big numbers the ultra light 8 kg machine gun KE7.

1949 Birth of a legend: 180,000 of the P 210 pistol implemented into the Swiss Army.

1953 – 1957 Indestructible success guarantee: The multifunctional “SIG Assault Rifle 57” persuaded the Swiss Army to buy over 700,000 rifles.

1975 Reliable and precise: The P 220 cal. 9 mm Para also known as “Pistole 75” was adapted to the needs of the Swiss Army. 140,000 pieces were delivered.

1976 – 1980 A new time began: The range of products extended with the models P 225, P 226, P 228, P 229, P 232, P 239. At the same time began the license to manufacture the new gas pressure assault rifle family SIG SG 540 and 543 in cal. .223 and SIG SG 542 in cal. 7.62 mm NATO.

1986 – 1999 The wave of success goes on: 450,000 SIG Assault Rifles 90 (Stgw 90) were delivered to the Swiss Army. Additionally ca. 35,000 rifles of the “SIG Stgw 90 PE”, the civil version of the SIG Assault Rifle 90, were produced. Development of the new SIG Pro. pistol and 4,000 pieces of the new 40 mm weapon mounted grenade launcher “GwA 97” were purchased by the Swiss Army.

2000 Extensive changes: SIG sold off all its divisions with the exception of the engineering section. The “small arms” division went to the “Lüke & Ortmeier Group” and was known as “SAN Swiss Arms AG”.

2006 Innovative upgrading: Thanks to new laser and light modules the SIG Stgw 90, SIG Stgw 90k and SIG Stgw 04 became more effective. The range of SIG SAUER sport pistol models expanded.

2007 Forward-looking diversification: Delivery of the SIG SG 553 to the Swiss Paratroopers. Based on the SIG SG 5XX family, the SIG SAPR precision rifle in cal. 7.62 mm NATO was developed. The first of these rifles goes to the Romanian Special Forces.

2009 – 2011 New family members: After successful testing of the new SG 751 SAPR it was marketed. Through the SAN 511 (.50 BMG) rifle the product line of precision rifles was expanded. The SIG 553 was given a new facelift. New materials and compatability to other systems (M16 / M4 magazines) completed the modular structure.

2013 Family expansion: With the SG 553 R in cal. 7.62 x 39 the SG 553 R also accepts the most common AK 47 magazines.

2014 – 2015 Through the enlargement of the product portfolio in the accessories segment, Swiss Arms is able to support its customers with perfect and comprehensive solutions.

Our innovation for tomorrow is based on our immense experience in the past.

SB = Short Barrel, LB = Long Barrel, LL = Barrel length
The extremely flexible, compact, and lightweight SG 553 AL (aluminium) assault rifle. It has been designed to be used by special units and law enforcement.

Thanks to the compact size, the SG 553 AL is a versatile weapon that can be used in any situation and especially in urban and forest locations. Perfect for short to medium combat distance (up to 300 m).
**SG 553 P**

The SG 553 Pistol in calibre 5.56 mm x 45 NATO is a very small and compact weapon. The SG 553 P is specially designed for law enforcement. Multi-purpose and qualified for all climate zones is the SG 553 P a perfect option up to medium combat range (300m).

The Ase Utra suppressors utilize advanced technology and quality materials. The suppressors are manufactured out of precision castings and machined using modern CNC-techniques. The Ase Utra suppressor designs are the result of innovative work and thorough research.

The BoreLock fast attach system is our newest generation of fast attach mounts.

The BoreLock mount provides a simple to operate and secure attachment to many of the common weapon models available.

BoreLock mounting suppressors are available for:

- 5.56 mm NATO assault rifles and light machineguns
- 7.62 mm NATO, .300 WM assault and sniper rifles
- .338 LM sniper rifles

The right laser solution for your needs

**SingleBeam Compact**
- Choice of wavelengths from visible to invisible IR
- Compact housing
- Adjustable X-Y centre

**TwinBeam**
- Choice of wavelengths from visible to invisible IR
- Select your favoured laser simply by twisting the switch
- Compact housing
- Each laser adjustable

**Hybrid Targetlaser Red Dot Sight / TwinBeam**
- Aimpoint Micro T1 (passive red dot sight)
- Each laser adjustable
- Best IR lighting for the perfect illumination of the combat field
- Select your favoured laser by twisting the switch
- Compact housing

**cFL Mk2 / Laser & Light Module**
- Visible or invisible IR mode
- Each laser adjustable
- High-performance LED-light >180 lumen power- and strobe mode
- 2x IR high power illuminator
- Trigger controlled
- Power indicator
- Waterproof up to 20 m

**LRF Mk3 Laser ranger finder**
- Compact
- Interface cFL Mk3 Laser and illuminating device
- Powered from cFL Mk3
- Operation over cFL Mk3
- Visible pilot laser to LRF to the carrier device

**cFL-02 Mk3 / Laser & Light Module**
- One adjustment for visible and IR Laser
- White light LED illuminator
- IR twin LED illuminator
- Remote cable control
- Interface for auxiliary (Range Finders and Cameras)

**Vingmate MR - Fire Control Unit**
- Precise range measurement
- Exact elevation angle
- First round hits
- Reduced collateral damage
- Lightweight and compact
- Day / night operation
- Easy zeroing
- Sight, target markers and laser range finder are always on target
- Rapid target shift-no zeroing when changing targets
**KAHLES K 624i  6-24x56i**

**THE SPECIALIST FOR LONG DISTANCES**

- Parallax adjustment from 50m to infinity
- Illuminated reticle in the first focal plane allow safe distance- and size measurements
- 11 year worldwide warranty and 2 year warranty on electronics

![New features](image1.png)

**KAHLES K 312i  3-12x50i**

**PRACTICAL PERFORMANCE FOR PROFESSIONALS**

- Most ergonomic scope in existence - windage turret integrated on the left side of the scope
- Innovative top mounted Parallax adjustment from 25m to infinity
- Illuminated reticle in the first focal plane allow safe distance- and size measurements
- 11 years worldwide warranty

NINE FUNCTIONS IN LESS THAN 1.3 KILO

Experience the full story at moskitoTI.vectronix.ch
G2X™ TACTICAL
A compact single-output polymer flashlight that uses a high-efficiency LED to provide a brilliant 320-lumen tactical beam. Features a press for-momentary-on and twist-for-constant-on tactical tailcap switch.
Output: 320 lumens
Runtime: 2.0 hours*

P2X FURY®
This dual-output pocket-sized searchlight is made of sculpted aerospace aluminum and features a virtually failure-proof LED that delivers 600 lumens of blinding output on high and 15 lumens of useful output on its low setting. Activates via a click-type tailcap switch.
Output: 600 / 15 lumens
Runtime: 1.5 / 46 hours

X300® ULTRA
The ultimate pistol light that also securely mounts to rail-equipped long guns. The X300 Ultra utilizes an ultra-high-output LED and beam-focusing TIR lens to produce a brilliant 500-lumen beam with extended reach and plenty of surround light for situational awareness. Own the best.
Output: 600 lumens
Runtime: 1.75 hours*

X400® ULTRA
The X400 Ultra combines stunning white-light illumination with a bright red- or green-laser sight (depending on the model) that mounts securely to handguns and rifle-length guns. It's ideal for close- to medium-range applications for law enforcement, military, and personal defense.
White-Light Output: 800 lumens
White-Light Runtime: 1.5 hours*

X400® V1Rc
This is a highly versatile dual-spectrum WeaponLight that boasts a (Class 1) infrared-laser sight for use with night vision devices. This groundbreaking X400 model—which mounts to handguns and long guns with MIL-STD-1913 rails—also offers a white-light and an infrared LED in its V-Series head to meet virtually any mission requirement.
White-Light Output: 150 lumens
White-Light Runtime: 1.8 hours*
IR Output: 120 mW
IR Runtime: 8 hours
Laser Output: 0.7 mW
Laser Runtime: 24 hours

XC1
The XC1 is SureFire's smallest, most lightweight handgun light. It features a recoil-proof LED that's focused by a multi-faceted reflector to create a broad 220-lumen MaxVision Beam™ perfect for illuminating and identifying threats at close range.
Output: 200 lumens
Runtime: 1.0 hour*
SureFire designs and builds the world’s finest flashlights, weapon-mounted lights, sound suppressors, and tactical gear for hardcore military, and law enforcement personnel. We use only the highest-quality materials, cutting-edge technology, and state-of-the-art manufacturing processes to produce battle-proven gear that gets the job done.

**M300 SCOUT LIGHT®**

Powered by one 123A** battery, this compact WeaponLight attaches to Picatinny rails via an integral thumbscrew clamp. Its high-performance LED produces a 300-lumen beam with plenty of reach and enough surround light to preserve situational awareness. Compact but powerful.

**Output:** 300 lumens  
**Runtime:** 1.2 hours*

---

**M600 ULTRA SCOUT LIGHT®**

Compact and powerful, this 123A-lithium-battery-powered WeaponLight securely attaches to MIL-STD 1913 rails via a thumbscrew mount. Its virtually failure-proof LED and beam-focusing TIR lens produce a high-intensity 500-lumen beam with extended range. (M600AA model, which accepts AA batteries, also available.)

**Output:** 500 lumens  
**Runtime:** 1.75 hours*

---

**SOCOM556-RC.2 SOUND SUPPRESSOR**

This second-generation 5.56 suppressor builds upon the best-in-class model, featuring SureFire’s patented Fast-Attach™ system, that was selected as first by US Special Operations Command (USSOCOM) in the most extensive and rigorous suppressor testing ever conducted. All SureFire SOCOM suppressors provide unmatched tactical benefits.

For 5.56 mm Rifles & Carbines  
(available in ten)

Export of select products shown requires a valid export license issued by the U.S. Department of State.

---

**SOCOM762-RC.2 SOUND SUPPRESSOR**

This second-generation 7.62 suppressor builds upon the best-in-class model, featuring SureFire’s patented Fast-Attach™ system, that was selected as first by US Special Operations Command (USSOCOM) in the most extensive and rigorous suppressor testing ever conducted. All SureFire SOCOM suppressors provide unmatched tactical benefits.

For 7.62 mm Rifles & Carbines  
(available in ten)

Export of select products shown requires a valid export license issued by the U.S. Department of State.

---

**EP4 SONIC DEFENDERS® PLUS**

Filtered EP4 earplugs provide extensive hearing protection while offering the ability to hear ambient sounds and conversations. They feature triple-flanged stems—made from hypoallergenic polymer—and patented EarLock® retention rings that comfortably and securely lock the earplugs in place.

Noise Reduction Rating (NRR): 24 dB

---

**EP7 SONIC DEFENDERS® ULTRA**

EP7 Sonic Defenders also protect your hearing without interfering with your ability to hear ambient sounds (with filters out) and use patented EarLock rings to comfortably stay in place. Their soft memory-foam Comply™ Canal Tips provide a higher Noise Reduction Rating (NRR) than flanged-stem models.

Noise Reduction Rating (NRR): 28 dB

---

**SUREFIRE 123A LITHIUM BATTERIES**

Optimized for use in SureFire illumination tools, these premium quality batteries provide the power that high-drain SureFire lights need, along with voltage maintenance, a long shelf life, and built-in fault and heat protection to ensure your safety!
Aimpoint® Micro T-2
High Performance Close Combat Reflex Sight

The new sight offers additional features and enhanced performance. Since its introduction in 2007, the Aimpoint Micro sight has become the worldwide standard for compact reflex sights. Law enforcement and military end users have embraced this sight for its compact size, durability, and extremely long battery life. Product reviews with professional end users identified a series of desired product enhancements that have now been added to this new product. These changes include: a new sight housing which allows the addition of front and rear protective flip covers and anti-reflective devices, additional physical protection for the sight’s adjustment turrets, increased durability added to the mount threading, and increased ruggedness for the sight’s internal electronic components.

- **Magnification**: 1x, unlimited eye relief
- **Clear Aperture**: 20mm
- **Aiming Dot Size**: 2 MOA (0.6 mRad)
- **Power**: 3V battery, Type CR2032
- **Dimensions (L x W x H)**:
  - Sight only: 68 mm x 41 mm x 36 mm (2.7” x 1.6” x 1.4”)
  - Sight & Mount & Flip-up lens covers: 77 mm x 42 mm x 46 mm (3” x 1.6” x 1.8”)
- **Mass**:
  - Sight only: 96 gr (3.4 oz)
  - Sight & Mount & Flip-up lens covers: 139 gr (4.9 oz)

THE FUTURE IN SIGHT

WHEN YOUR LIFE DEPENDS ON YOUR EQUIPMENT
What we do

We never copy the designs of other manufacturers as there is always a need for improvement.

Our ISMS™ scope mounts is a perfect example of our innovative designs. For more than a hundred years scope mounts have looked basically the same - with the same limitations - regardless of the manufacturer. That is, until our ISMS™ came on the market in 2010. We have taken the scope mount from just being a way of attaching the scope to a firearm to a platform with a system for mounting the scope as well as accessories such as back-up sights, NV, lasers and cosine meters. At the same time we made our scope mount sturdier than any competing product, invented a new system for aligning the scope’s rotation and constructed it so that the adjustment knobs are more visible than on probably any other mount. This means that you can check your adjustments almost without moving your head.

Convenient on the range for sure, but a life-saver if you are a deployed sniper who is checking your values when in hide.

Another good example of our innovative products is our 40 mm grenade launcher sight mount. Most sights have the readings on the side, whereby the soldier is unable to read the distance settings while aiming. We have made a sight mount where the soldier can see and adjust the range setting while still in the shooting position. Tritium inserts or luminous paint ensures that any adjustments can be done in low-light conditions as well. Our humble experience tells us that combat environments have a tendency not to be optimally lit. Our many customers at the tip of the spear around the world tell us that we are right.

OUR MISSION IS TO PRODUCE INNOVATIVE SOLUTIONS CONTAINING A MINIMUM OF PARTS.
STANDARD ISSUE WITH MANY GOVERNMENTS WORLDWIDE.

Specified for use by the Marines, U.S. Army and Navy Seals, self-illuminating Trijicon scopes and sights have earned a reputation as the most sophisticated and dependable combat optics on the battlefield. On patrol, you can never be certain of your situation, but with multiple models to choose from, there is always a Trijicon combat optic that can help you accomplish your mission.
Trijicon RMR®
Sight Adjustable LED – 1.0 MOA Red Dot

Developed to improve precision and accuracy with any style or caliber of weapon, the Trijicon RMR (Ruggedized Miniature Reflex) is designed to be as durable as the legendary ACOG. The RM09 is an LED sight powered by a standard CR2032 battery. Housed in rugged forged aluminum, it’s extremely tough yet lightweight. The easy-to-use adjusters with audible clicks allow for quick windage and elevation adjustments.

With eight available brightness settings, the reticle can be manually adjusted by pressing the plus or minus buttons on either side of the unit. To switch to auto adjust mode simply press both buttons simultaneously and release. To save battery life turn the optic off by pressing both buttons simultaneously and holding for 3 seconds.

Trijicon MRO™

The Trijicon MRO™ (Miniature Rifle Optic) is a sealed miniature reflex sight intended for use on rifles, carbines and shotguns to provide fast target acquisition. The large aperture and tapered light path maximizes the viewing area and allows for better situational awareness and fast target engagement — especially from non-standard shooting positions. Combine all this with the ambidextrous brightness controls, sub-flush adjusters, advanced lens coatings and the fully sealed, waterproof, hard anodized forged 7075-T6 housing and you have the ultimate mini reflex sight on the market.

Trijicon ACOG® 3x24 Scope

The Trijicon ACOG 3x24 Scope and the Trijicon ACOG 1.5x16S Scope is a fixed magnification riflescope with an illuminated reticle pattern for use in any lighting conditions.

Dual illumination provides two sources of battery-free illumination — fiber optics and tritium. The fiber optics use ambient light to automatically adjust the brightness level and contrast of the reticle to available light conditions. The tritium-phosphor lamp glows in low-light conditions.

The ACOG body is designed to be extremely rugged and reliable. The forged 7075-T6 aircraft-grade aluminum alloy housing provides for a nearly indestructible sighting system. No other magnified optic has been used more in combat than the Trijicon ACOG.

The low height body design allows for the lowest possible mounting configuration. This achieves the desirable height above bore for the AK and other select firearm models with lower cheek welds.

No tools are needed for windage and elevation adjustments because the ACOG features external adjusters. All adjuster caps are provided with a lanyard assembly to minimize the loss of caps.

The Bindon Aiming Concept (BAC) allows the operator to keep both eyes open while engaging targets and maintaining maximum situational awareness.

Made in the USA.

Trijicon ACOG® 1.5x16S Scope
Commissioned and officially adopted in 2002 by the 9° Rgt. Incursori „Col. Moschin”, this model is the quintessence of a pure combat knife. Inspired by daggers with an asymmetric blade and straight but slightly orientated handle used by the Arditi, in whose footsteps the Col Moschin Regiment follows, it has been re-elaborated in a modern form, endowed with a double edged blade, (single for the civilian version), integral guards and a removable E.R.M.H. handle in Forprene. Both grindings are hollow grind razor sharp. The centre of gravity is towards the end of the handle, the point especially sharp, it is light, manageable and intuitive.

Probably a milestone in the multi-knives. Widely used in Afghanistan as standard equipment by members of the Italian mission „NIBBIO”, this knife is part of an experimental project of Alpine Troops Command equipment renewal. During the preparation of this important mission, the Alpine Troops Command worked with a team of companies to produce a complete and renewed individual experimental equipment. Extrema Ratio was selected and contacted for the development of a multi-tool for infantry; a knife that could be used at all latitudes and in any kind of problem which could not be solved by the specialized equipment.

This series of extremely compact folding knives is the result of interaction between Extrema Ratio and the military and police with whom we collaborate.

This model is the evolution of the Fulcrum Folder (out of production since 2005), the first folding knife produced by Extrema Ratio according to the specifics of an Italian anti-terrorism unit. The requirements were:

- an extremely robust blade that could be used
Ever since its establishment in 2002, entrepreneurial courage and the demand for maximum quality have been characteristic for GSG. Products by Specialists—this guiding principle expresses the commitment of experienced professionals and can be found in any of our products. As one of the leading manufacturers of firearms in Caliber .22lr we enjoy the confidence of gun lovers worldwide.

We also delight our customers with innovative ideas in the fields of softair guns, air guns, outdoor and security products.
